

WHY PAY THE PRICE FOR A LEASED LINE

When Broadband isn't enough, Atlas DedicatedConnect can provide your business with a dedicated, reliable, high speed connection.

INCREASED PRODUCTIVITY

Uncontended connections where you don't share bandwidth with anyone else, offer the fastest speeds to keep your business working. Plus symmetrical speeds are ideal for voice traffic (VoIP) and more.

GUARANTEED RELIABILITY

Strong SLAs with services delivered via fibre to your office ensure that business critical applications stay connected with 24/7 support.

SECURITY

A leased line is not shared with others, meaning your traffic is private. Fixed lines are more secure than standard Broadband services.

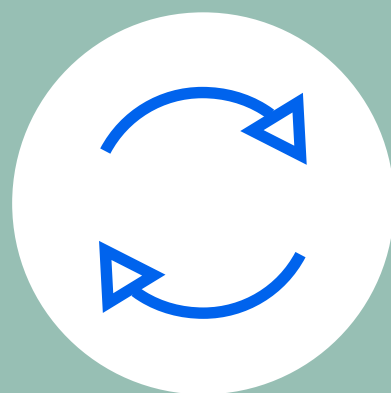

SPEEDS

As the connection is exclusively yours, you can enjoy fixed guaranteed bandwidth with higher speeds - even during peak times.

BUSINESS CONTINUITY

Scale up as your business grows with Liquid Bandwidth, long or short term, without the long lead times and one-off change control costs.

WHO WOULD BENEFIT FROM A LEASED LINE

- Businesses with high data / voice needs that require a reliable connection
- Those businesses who transfer large amounts of data or upload large files regularly
 - If you use (or plan to use) VoIP Telephony
- If you rely on a solid connection for ordering, processing sales and video conferencing
