

Cyber security is a constantly moving area that grows as we continue to connect to and run our businesses over the internet. From email to running applications and even actively trading using the web, new threats are emerging every week.

Making sure your business is protected and can recover if the worst happens may seem like a complex business for SME's, but we have made it simple.

LockIT from Atlas is a new multi-layered IT security package specially designed for SMEs to enable them to have a holistic approach to their cyber security, all in a single pay per month package.

**Starting from only £50 per month for up to 5 users, making peace of mind affordable.**

Extensive Anti Malware & Anti-Virus services protect against advanced threats. Additional features such as Firewall & Web Filtering are also available.

Backup of your data to the Cloud, so if the worst happens you can recover business critical data and avoid costly business downtime.

Benefit from Local support with our team of highly skilled engineers whose expertise ensure a quick and effective response with minimum disruption.

**For a free no obligation chat about how we can help to keep your business safe, please call us on 02890786868.**
