

# VoiceOne

Hosted Telephony

# The ideal cloud telephony solution for businesses who want a flexible cost approach to their telecoms

---

Atlas VoiceOne is a VoIP telephony solution that is fully hosted on Atlas' Cloud infrastructure. Using SIP Trunks to traffic calls over the internet instead of traditional ISDN or PSTN lines, it is the ideal solution for businesses who want a flexible cost approach to their telecoms without the large capital outlay.

## Why Atlas Cloud?

Atlas VoiceOne provides you with a complete communications service with multiple features available, all managed through an easy to use web interface. Designed to meet the needs of businesses requiring a feature rich but low cost telephony platform.

VoiceOne offers a smooth migration path from traditional ISDN connections to SIP with all licencing for SIP trunking on board and ready.

### Flexible feature sets include:

- Call forwarding and 'follow me'
- Day/night service messages
- Mini call centre option
- Conference calling
- Hot desking
- Voicemail
- Custom on hold messages
- Call recording
- And more

You only pay for the features & functions you need and your Account Manager will be able to help guide & assess your needs with a '7 Point Audit' of your telephony included as standard. This helps ensure that the migration process is as smooth as possible.

## Benefits:

### TRANSPARENT, PER USER PRICING

It's simple, you only pay for what you need. There is no need for expensive hardware and we have a range of phones for you to choose from. A simple monthly per user rental scheme allows flexibility.

### FULLY ATLAS MANAGED

We own the platform, so we can better service your needs. All of our VoiceOne Telephony platforms are maintained by our experienced and dedicated telephony engineers.

### EASILY CONTROLLED FEATURES

VoiceOne Telephony puts you in complete control of your phone system through an easy-to use, customisable and flexible web interface. Simply choose the functions you would like and the rest is in your hands.

*Telephony has been at the heart of Atlas' business for over 30 years and we continue to be one of the leading providers of telephone systems.*

### FLEXIBLE FEATURE SETS

VoiceOne provides PBX functions such as automated attendant and voicemail. There are also many advanced features including remote extensions, voicemail to email, call recording and many more.

### ENABLES FLEXIBLE WORKING

Make working days and locations more flexible by enabling hot desking, home working and extending the service to mobile phones.
